Important update EndNote X7.2 released:

EndNote X7.2 enables sharing of research results for researchers

The Scholarly & Scientific Research division of Thomson Reuters has released an important update of their program EndNote® Hybrid, the bibliographic software which is used by millions of researchers, librarians and students all over the world.

EndNote X7.2 (http://researchsoftware.com/en/news/endnote-x72-released) now offers researchers the possibility to work in groups up to 15 and share their research results online, enabling each of the group members to add, annotate an use the library at the same time. There is no charge for sharing, no library size limit and no charge for unlimited cloud storage. This free update, including the new features, is only available for people who are already using EndNote X7.

EndNote X7.2, including EndNote Online, is software to enable fast and effective research and to publish the results easily, thanks to the unique and patented Cite While You Write™ technology. With Cite While You Write one can easily add references in text documents such as Theses, reports and (scientific) publications. It will automatically create a bibliographic list at the end of the document.

A complete overview of all features of EndNote X7.2 can be found at **www.researchsoftware.com**.
